

3.1 Stakeholder Analysis

1. Users

Role: Primary users of the system who search for restaurants and explore available options.

Needs:

- Search for restaurants easily
- View ratings and reviews
- Filter results based on preferences
- Access restaurant locations through maps
- Save favorite restaurants

Interest in System: High

2. Admin

Role: Responsible for managing and monitoring the system.

Needs:

- Manage restaurant data
- Update or remove incorrect information
- Moderate reviews and user-generated content
- Monitor system performance

Interest in System: High

3. Developers

Role: Responsible for building, maintaining, and improving the system.

Needs:

- Reliable API integration
- Scalable architecture

- Maintainable code structure
- Error handling and security implementation
- Performance optimization

Interest in System: High

4. Restaurant Owners

Role: Provide restaurant information and interact with customer feedback.

Needs:

- Update restaurant details
- Manage menus and photos
- Monitor ratings and reviews
- Increase visibility to customers

Interest in System: Medium to High

3.2 User Stories

For General Users

- As a user, I want to search for restaurants by name or location, so that I can find nearby places to eat.
- As a user, I want to filter restaurants by category, rating, and price range, so that I can choose the best option based on my preferences.
- As a user, I want to view restaurant details, so that I can see opening hours, menu information, and contact details.
- As a user, I want to read customer reviews and ratings, so that I can make informed decisions before visiting a restaurant.
- As a user, I want to view restaurants on a map, so that I can locate them easily.
- As a user, I want to save restaurants to a favorites list, so that I can access them later.
- As a user, I want to sort search results by rating or distance, so that I can find the most suitable restaurant faster.

- As a user, I want to view restaurant photos, so that I can better evaluate the place before visiting.

Login/Register (لو هتضيفي) لو عندك Authentication

ممکن تزودي:

- As a user, I want to create an account, so that I can save my preferences and favorite restaurants.

- As a user, I want to log in to my account, so that I can access my saved data.

User Stories for Developers

- As a developer, I want to integrate the Yelp API, so that restaurant data can be fetched dynamically.

- As a developer, I want to implement reusable React components, so that the system is maintainable and scalable.

- As a developer, I want to optimize search and filtering performance, so that users receive fast results.

- As a developer, I want to handle API errors properly, so that the system remains reliable when external services fail.

- As a developer, I want to maintain secure data handling, so that user information is protected.

User Stories for Admin

- As an admin, I want to add restaurant records, so that the database stays updated.

- As an admin, I want to edit restaurant information, so that incorrect or outdated data can be corrected.

- As an admin, I want to remove invalid or duplicate restaurant entries, so that the system maintains data quality.

- As an admin, I want to manage user reviews, so that inappropriate content can be moderated.

- As an admin, I want to monitor system performance and usage, so that service quality can be maintained.

User Stories for Restaurant Owners

- As a restaurant owner, I want to update my restaurant information, so that customers can see accurate details.
- As a restaurant owner, I want to upload menu details and photos, so that users can better evaluate my restaurant.
- As a restaurant owner, I want to respond to customer reviews, so that I can improve customer engagement.
- As a restaurant owner, I want to track ratings and feedback, so that I can improve my service.
- As a restaurant owner, I want my restaurant to appear in search results and maps, so that more customers can discover my business.
